## IN THE UNITED STATES PATENT & TRADEMARK OFFICE

Carter et al. Atty Docket: 16279-14C1

"DEVICE AND METHOD FOR TRENCHLESS REPLACEMENT OF

Serial No: 09/939,084 Art Unit: 3671

Filing Date: August 24, 2001 Examiner: Mayo, Tara L.

UNDERGROUND PIPE"

Box Non Fee Amendment Commissioner for Patents Washington, D.C. 20231

## **AMENDMENT**

Responsive to the Office Action mailed June 5, 2002, please amend the application as follows:

## In the Abstract

Please delete the Replacement Abstract that was submitted with the Preliminary

Amendment and insert the Substitute Abstract submitted herewith on a separate page.

# In the Claims

Please delete claims 1-48, without prejudice. Applicant will file a continuation application to pursue these claims.

Please amend the claims by replacing like numbered claims with the amended claims set forth below. A marked up version of the amended claims is provided herewith as Attachment A.

(Once amended) A device for the trenchless replacement of in-situ pipe, comprising:

a mole:

a length of cable, said being engagable to said mole;

means for pulling said cable in a plurality of cable pulling strokes; and

means for releasably holding said cable between said cable pulling strokes, including a cable engaging device that grips said cable between said pulling strokes, and releases said cable on a pulling stroke.

1

(Once amended) A device for the trenchless replacement of in-situ pipe, comprising:

a mole;

a length of cable, said cable being engagable to said mole;

a means for pulling said cable in a series of cyclic strokes that include a pulling stroke and a recovery stroke;

a first cable engaging member that engages said cable on said pulling stroke and releases said cable on said recovery stroke; and

a second cable engaging member that engages said cable on said recovery stroke and releases said cable on said pulling stroke.

## REMARKS

In paragraph 1 of the Office Action it is indicated that the Information Disclosure Statement filed August 24, 2001 fails to comply with certain statutory provisions because all of the references cited therein are not listed on a form PTO-1449. Responsive thereto, Applicant firstly notes that the Examiner has not initialed reference BQ on the PTO-1449 form submitted by Applicant. Applicant therefore specifically requests consideration of reference BQ and that reference BQ be initialed on Applicant's PTO-1449 form.

With regard to the references cited by Applicant that were not listed on a PTO-1449 form, Applicant specifically notes that the two references are Fisk '542 and Lincoln '832. Applicant further notes that these two references are specifically cited in the PTO-892 notice from the Examiner, and they are specifically applied to the claims in the Office Action. Applicant therefore respectfully submits that a further PTO-1449 from the inventor is not enecessary in that these two reference have been considered as to the merits. Applicant therefore respectfully submits that this issue has been resolved.

In paragraph 2 of the Office Action it is indicated that the proposed substitute sheets of adrawings have been approved. Applicant appreciates the approval.

In paragraphs 3-5 of the Office Action the Abstract is objected to because it refers to purported merits and speculative applications of the invention, and it includes legal phraseology. Responsive thereto, Applicant is unclear whether this objection is directed to Applicant's "Replacement Abstract" that was submitted with the Preliminary Amendment or the original Abstract that was submitted with the copy of the Specification. Nevertheless, Applicant has provided herewith a Substitute Abstract on a separate page, whereby Applicant submits that this ground of objection has been satisfied.

In paragraphs 6-17 of the Office Action various objections and rejections of claims 1-47 are stated. Responsive thereto, and in light of the indication of allowability related to claims 49-72 (as discussed below), Applicant has elected to delete claims 1-48 without prejudice from this application, and to file a continuation application in which the further prosecution of claims 1-47 will be conducted.

In paragraph 18 of the Office Action it is indicated that claims 51-72 are allowed. Responsive thereto, Applicant appreciates the indication of allowable claims, and in reviewing claim 51, Applicant notes an inadvertent error which Applicant has corrected in this Amendment by adding the word "cable" after the word "said".

In paragraphs 19 and 20 of the Office Action it is indicated claims 15, 49 and 50 are objected to as being dependent upon a rejected base claim but allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Responsive thereto, Applicant has deleted claim 15, without prejudice, from this Application in favor of a continuation application to be shortly filed. With regard to claims 49 and 50, Applicant has amended claim 49 to include all of the limitations of independent claim 48 from which it depends, and claim 48 has been deleted without prejudice. Applicant therefore respectfully submits that amended claim 49 and dependent claim 50 (which depends from claim 49) have how been rendered allowable.

In paragraph 21 of the Office Action the Examiner's response to Applicant's remarks in Applicant's Preliminary Amendment are provided. Applicant appreciates the Examiner's close attention to Applicant's remarks and Applicant will address the Examiner's response in the continuation application to be filed shortly.

In paragraph 22 of the Office Action further art is made of record. Applicant has reviewed the art and finds that the teachings thereof do not affect the allowability of the remaining claims 49-72 of this Application.

Having responded to all of the paragraphs of the Office Action, and having amended the claims accordingly, Applicant respectfully submits that the claims, as amended, are now in condition for allowance. Applicant therefore respectfully requests that a Notice of Allowance be forthcoming at the Examiner's earliest opportunity. Should the Examiner have any questions or

comments with regard to this Amendment, a telephonic conference at the number set forth below is respectfully requested.

## SUBSTITUTE ABSTRACT

A trenchless pipe replacement device including a pipe parting mole, a length of cable that

is engagable to the mole, a cable pulling device and a cable pulling device engagement means that provides a mounting structure for the cable pulling device. The cable pulling device includes a reciprocating cable engagement mechanism that grips the cable on a pulling stroke

and holds the cable on a recovery stroke. The cable pulling device engagement means generally includes a reaction plate and a structure for removably engaging the cable pulling device therewithin. A cable pulling frame may be advantageously used to facilitate the removal of the cable from a relatively small hole that is created at the pulling end of the pipe.

# MARKED UP VERSION OF THE AMENDED CLAIMS

1	49. (Once amended) [A device as described in claim 48, wherein said means for releasably
2	holding said cable consists of] A device for the trenchless replacement of in-situ pipe.
3	comprising:
4	a mole:
5	a length of cable, said being engagable to said mole;
6	means for pulling said cable in a plurality of cable pulling strokes; and
7	means for releasably holding said cable between said cable pulling strokes, including a
8	cable engaging device that grips said cable between said pulling strokes, and releases said cable
9	on a pulling stroke.
1	Once amended) A device for the trenchless replacement of in-situ pipe, comprising:  a mole;  a length of cable, said <u>cable</u> being engagable to said mole;  a means for pulling said cable in a series of cyclic strokes that include a pulling stroke
2	a mole;
3	a length of cable, said <u>cable</u> being engagable to said mole;
4	a means for pulling said cable in a series of cyclic strokes that include a pulling stroke
5	and a recovery stroke;
6	a first cable engaging member that engages said cable on said pulling stroke and releases
7	said cable on said recovery stroke; and
8	a second cable engaging member that engages said cable on said recovery stroke and
9	releases said cable on said pulling stroke.
